VINCOR COMPLETES 52-HOUR OSHPD APPROVED POWER OUTAGE AT THE OCCUPIED RIVERSIDE COUNTY REGIONAL MEDICAL CENTER, MORENO VALLEY, CA

(Brea, CA) – **Vincor Construction, Inc. (Vincor)** performed as the prime contractor for the removal and replacement of the main hospital switchgear with new 480Y/277V 3-Phase 4-Wire service and all necessary connections to the pad-mounted transformer. Old conductors from the existing leaky conduits, which run below the switchgear, were pulled and new conductors were installed in new conduit traveling overhead of the switchgear and entering the new switchgear from above.

With the main facilities in the building remaining occupied and operational during construction, Vincor provided five (5) temporary diesel generators to supply continuous power while the existing switchgear was taken offline. We implemented stringent measures to ensure that the health and safety of the patients, staff and visitors was maintained at all times. For managing power outages and other serious events, there are no second chances in mission-critical environments, therefore work was incisively coordinated over several weeks with the Riverside County Regional Medical Center, Office of Statewide Health Planning and Development, our key subcontractor Champion Electric, Inspector of Records, Riverside County Economic Development Agency, Southern California Edison, RASC Engineering LLP, and GKK Architects to develop the most efficient Methods of Procedure and ensure the on-going operations of the medical center were uninterrupted.

Unique to this utility coordination effort, and prior to shutdown, two (2) trauma patients were rushed into the Emergency Room delaying the utility shutdown until the patients could be adequately stabilized. Vincor mitigated the scheduling conflicts and completed this high profile utility shutdown ahead of schedule, with no trauma diversion, and with ZERO safety incidents.

About Vincor Construction, Inc.

Since our inception, Vincor has successfully completed hundreds of construction projects in support of Federal/State/Local Governments, Municipalities, Healthcare, Higher Learning, and Private Industries. As a full service general contractor, we have demonstrated the ability to be an integral part of the Owner/Architect/Contractor team on some of the most complex and challenging building programs ever undertaken. Our superb reputation is built on integrity and our strong commitment to excellence in the workplace. As an **SBA 8(a) Certified, Minority-Owned, Small Disadvantaged Business**, Vincor is organized into client-focused divisions, each with its own multi-disciplined team of quality subcontractors, engineers, planners, and technical support personnel.
